

TTAC: The Truth About Cancer Docu-Series

Echo® Water Expert of TTAC All 3 Years 2013-2015:

Paul Barattiero, C.Ped. Echo® Owner/Founder/President: “It’s all about the molecular hydrogen... It’s true science... The most cytotoxic or cell-damaging free radical in the body is called a hydroxyl radical (OH). Molecular hydrogen (H₂) combines with OH to create water (H₂O) in the cell. So you’re converting the most cytotoxic free radicals water molecules – very, very powerful. We have a few animal studies, a few human studies, and some cell studies showing that molecular hydrogen benefits cancer.”

TTAC Moderator/Founder 2015 Echo® Endorsement:

Ty Bollinger, Speaker at Cancer Convention: “I firmly believe in the power of molecular hydrogen. My family and I own one of Paul’s Echo® devices in our house and that’s the water that we drink every day.”

Personal choice of Dr. Robert Scott Bell, Dr. Daniel Nuzum, “Doc of Detox” Dr. Darrell Wolfe, & other speakers on TTAC.
